U. S. Patent and Trademark Office PTO-326 (Rev. 9-97)

Part of Paper No.

Application/Control Number: 09/676161 Page 2

Art Unit: 1771

DETAILED ACTION

15. The Examiner acknowledges papers # 6 and 7, the extension of time and the amendment of 12/12/2002.

Election/Restriction

- 16. The Restriction affirmation of Group II, claims 17-25, with traverse is acknowledged. Group I, method of making, claims 1-17 is withdrawn. The cancellation of claims 1-17 is acknowledged. New claims 26-36 are acknowledged and are drawn to the article claims 17-25, Group II.

 Applicant's traversal has been considered regarding the method claims but the method does not necessarily require the making of the claimed article claims. Restriction is made final for reasons of record.
- 17. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
- 18. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with37 CFR 1.48(b) if one or more of the currently named inventors is no longer

Art Unit: 1771

an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Claim Rejections - 35 USC § 112

19. Applicant's amendment has removed the rejection of claims 19-21, 23,25.

Claim Rejections - 35 USC § 102

20. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 17, 31, 32 are rejected under 35 U.S.C. 102(a) as being anticipated by JP-09-119067.

JP'067 describes wiping cloth of woven or knitted fabric comprising super fine polyester filaments, (see [0004 and 0005] of translation. JP'067

Art Unit: 1771

describes the wiping cloth is a knitted or woven fabric of ultrafine fibers of polyester yarn, [0006]. JP'067 describes heat treatment of 130 degrees C (which corresponds to 266 degrees F and encompasses the claimed invention range or 180-300 degrees F and is not heat set above this), [0020]. JP'describes the essential limitations of the claimed invention. Claims lack novelty.

Claim Rejections - 35 USC § 103

- 21. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 17-25, 26-36 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP-09-119067.

JP'067 as above in paragraph # 20 with the difference being the particle count and fabric weight with a sealed package.

Application/Control Number: 09/676161 Page 5

Art Unit: 1771

It would have been obvious to one of ordinary skill in the art at the time the invention was made to optimize the particle count, fabric weight since it has been held that where the general conditions of the claim are disclosed in the prior art, corresponding to temperature processing, discovering the optimum or workable ranges of particle count and fabric weight for wipers would involve routine skill in the art, In re Boesch, 617 F.2d 272, 205 USPQ 115 (CCPA 1980). Regarding a sealed package it would be obvious to one of ordinary skill in the art to adjust size of the wiper for a package. Regarding texture, textured fibers are well known, see Pike 5,935, 883, column 4, lines 45-46).

Applicant's arguments regarding the process limitations have been met by JP'067. Applicant's arguments are not to be directed to the new art of record since the previous rejection was withdrawn.

22. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE**

Page 6

Application/Control Number: 09/676161

Art Unit: 1771

FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

23. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John J. Guarriello whose telephone

Art Unit: 1771

number is 703-308-3209. The examiner can normally be reached on Monday to Friday from 8 am to 4 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Terrel Morris, can be reached on (703) 308-2414. The fax phone number for the organization where this application or proceeding is assigned is 703-305-5408.

SUPERVISORY PATENT EXAMINER
